# PUBLIC WORKS

T&M Associates' experience with local governments is unparalleled. For over 40 years the firm has provided a full spectrum of services to municipalities, counties, state agencies and authorities, helping to find innovative solutions to maintain and develop critical areas of infrastructure. When a client needs to find the most qualified and professional service for their public works needs, they turn to our seasoned professionals for guidance.

T&M Associates is comprised of nearly 300 professionals and technical support staff holding over 100 professional licenses. Our team includes civil, traffic, transportation, structural, electrical and environmental engineers, as well as professional planners, landscape architects, environmental scientists, land surveyors, construction inspectors and more.

No matter the public works project, T&M is ready to meet the challenge with practical solutions. We have completed a wide array of public projects including park and recreational facilities; storm drainage facilities; bridges and roadways; neighborhood redevelopment; water supply, treatment and distribution; as well as wastewater collection and treatment facilities. Our municipal engineers review major development site plans submitted to planning boards and help municipal officials negotiate fair-share, offsite contributions from commercial and residential developers.

Utilizing our extensive capabilities in the design, construction, inspection and maintenance of all municipal infrastructure assignments, T&M leads the way by providing extensive services to the public works sector.
