

Energy Efficiency & Cost Reduction Programs

In these tough economic times, energy conservation and the opportunity for alternate means of energy generation are more important than ever. In response to that, New Jersey has made many **funding opportunities** available to help people invest in Energy Efficiency/Cost Reduction Programs. By taking advantage of these programs, you can implement projects to lower your

overall energy consumption and carbon footprint. T&M Associates (T&M) is here to help you get on your way.

T&M has successfully completed numerous energy conservation and renewable energy projects throughout the region. As environmental concerns grow and the energy industry continues to develop, T&M continues to maintain our position on the forefront of the developing technologies, funding opportunities and regulations related to the

market. Our capabilities combine knowledge of energy conservation and energy generation including solar, wind and biofuel systems, allowing us to provide an overall evaluation of a facility's energy situation.

The firm was recently selected as a **Partner in the New Jersey Clean Energy's Pay for Performance Program**. Pay for Performance, the newest program from New Jersey Clean Energy, rewards larger energy consumers who comprehensively upgrade their facilities through investments in energy efficiency. This ground-breaking program offers up to \$3 million in incentives to customers whose facilities have an average annual peak electric demand over 200 kW. T&M's acceptance into the Pay for Performance partner network is in recognition of our dedication to energy efficient technologies and experience incorporating these technologies into existing facilities. As an approved partner, T&M will work closely with facility owners to develop an Energy Reduction Plan for their facilities.

The staff at T&M includes team members who are professional engineers, LEED-GA certified professionals and Members of the US Green Building Council. Our collective experience and training allows us to guide our clients through the extensive process of analyzing current energy usage and needs to finding energy saving solutions; and securing the funding to put them into action.

T&M Associates Offers...

Benchmarking Existing Energy Usage

- Physical Site Inspections of Existing Facilities
- Review of Energy Records
- Analysis of Future Development Plans
- Preparation of a Model of Existing Energy Usage
- Creation of Energy Master Plans

Investigate Energy Alternatives

- Energy Conservation Methods
- Renewable Energy Options

Economic Assessment

- Evaluation of Incentive Programs, Rebates and Grants
 - Sales of Renewable Energy Certificates
 - Low Interest Loans
 - Renewable Energy Incentive Program
 - Energy Efficiency and Conservation Block Grants
 - New Jersey Department of Education Debt Service Aid (for Board of Education Projects)
 - New Jersey Clean Energy Pay for Performance Program
 - New Jersey Clean Energy Direct Install Program
 - Power Purchase Agreements with Third Party Developers

Implementation of Owner Selected Options

- Preparation of Grant/Rebate Applications
- Engineering Detailed Designs
 - Site/Civil Engineering
 - Electrical Engineering
 - Mechanical Engineering
 - Structural Engineering
 - Environmental Permitting
 - Survey
- Utility Coordination
- Bidding Assistance
- Construction Administration

Assistance with the Sale of Renewable Energy Certificates

**With T&M Associates' help,
you do have the power to save!**
